SUMMARY

MERN stack developer focused on building responsive, modern web applications. Comfortable taking a business requirement from idea to a functional, maintainable product — frontend, backend and database. Internship experience building real-world, role-based web application features. Practical, detail-oriented, and continuously improving.

SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST APIs

Database: MongoDB

Programming: C, C++, OOP

Tools: Git, GitHub

Soft Skills: Problem Solving, Communication, Adaptability, Continuous Learning, Attention to Detail, Understanding Business Requirements

EXPERIENCE

MERN Stack Developer Intern

Ypsilon IT Solutions Pvt Ltd

- Built responsive UI components in React.js and integrated REST APIs between frontend and backend.
- Worked on a real-world logistics/relocation web application, contributing to booking workflows, role-based functionality (customer, partner, admin) and admin tooling.
- Used Node.js, Express.js and MongoDB to build and connect backend functionality to the database.
- Collaborated within an existing codebase and team development process.

PROJECTS

Movers & Packers Logistics Platform — *Internship project*

A real-world booking and operations platform built during my internship, covering customer bookings, role-based access, admin dashboards and partner-side functionality. React.js, Node.js, Express.js, MongoDB, REST APIs.

Calculator Application — *Independent build*

A clean, responsive calculator built to practice core JavaScript logic, DOM handling and interface design. HTML5, CSS3, JavaScript.

Personal Portfolio Website — *Independent build*

A premium, conversion-focused personal portfolio built to present my work to recruiters and freelance clients. Responsive layout, reusable component architecture and animated UI. React.js, Tailwind CSS.
